2 Ring 25 piece 2.4 metre diameter

All sizes range from 25 - 35 mm in thickness

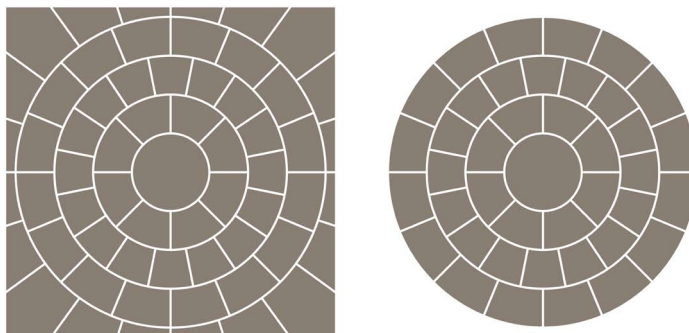

Part radius kits and squaring off kits available

Indian sandstone paving exhibits a wonderful range of warm and colourful natural tones. As always with any natural stone there will be colour variations.

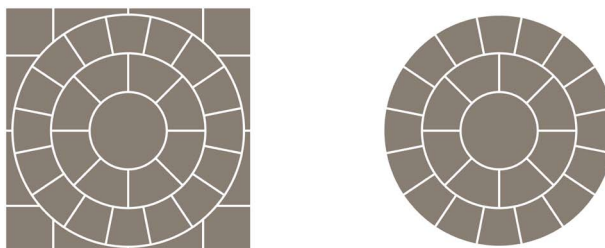

Indian Stone is very durable and can withstand the rigors of harsh weather conditions. It is suitable for both outdoor and indoor applications and has also proved successful when applied with under floor heating.

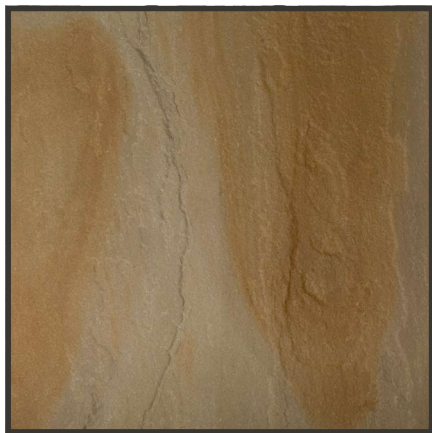

Indian Stone has excellent skid resistance wet or dry. If installed outdoors we recommend cleaning periodically with a power washer to remove any build up of mosses or lichens to retain the slip resistant qualities of the stone.
