

Stone Setts

Natural Limestone and Sandstone blocks

AVAILABLE IN SIZES (mm)

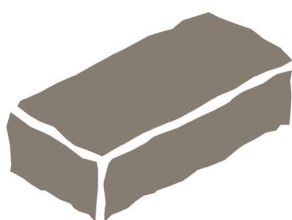

200 x 100 x 50
100 x 100 x 50

Sandstone is the most widely used natural stone presently available. Renowned for its natural beauty and subtle variation in colour, it is the natural choice for countless paving applications in garden paving and paving slabs. All Sandstone paving is supplied with hand split surfaces and hand dressed edges unless otherwise stated.

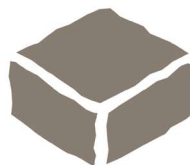

Limestone paving is a popular alternative to sandstone due to its very hard wearing properties. The lightly textured surface makes it perfect for applications where a flat surface is essential. Our black limestone has been specially selected for its subtle colour variation and quality finish making it the ideal product for both modern & traditional properties.

As always with any natural stone there will be colour variations.
